

THARMAH LIMITED

Water Resource & Borehole Contractors

www.tharmahlimited.com

Who are we?

THARMAH LIMITED is a professional contracting company that provides sustainable water solutions through borehole development, maintenance and auxiliary works.

Our Vision

To provide sustainable water solutions across all entities including individuals, community programs and both governmental and non-governmental institutions.

1. Hydro-geological Survey

We conduct detailed scientific study to map out water bearing structures optimal for borehole development. We also advise on the construction parameters in keeping with the findings to optimize the borehole capacity.

2. Borehole Drilling

We offer optimised drilling solutions for both domestic and commercial borehole system in keeping with the statutory standards and guidelines.

3. Pumping Systems

Our wide range of electric and solar pumps products cater for low flow pumping systems; effective for domestic and subsistence use, as well as Moderate and High flow pumping systems designed for Commercial scale use such as irrigation and commercial distribution and etc.

4. Water Storage Units

With changing weather patterns, the need for water harvesting and storage has become necessary as part of sustainable solutions to alleviate shortages as a result of these changes.

At Tharmah Limited, we supply and install a variety of water storage options which include: - elevated structures for PVC tanks, sectional steel tanks as well as Dams.
